

PR SERIES | INVERTER

Plasma
 CUTTERS

Plasma cutting systems utilizing inverter technology with internal compressor. Portable, single-phase, microprocessor-controlled and equipped with pneumatic torch without HF. Easily used even at a distance from a compressed air source. They produce quality cutting on all conductor materials such as steel, stainless steel, aluminium, copper, brass, etc. Suitable for lightweight and heavy bodywork, maintenance of large installations, air conditioning systems, shipyards and metalwork in general.

Consumables Compartment

Available Units

- PR-111 110V, max 20A
- PR-112 220V, /w Air Compressor (Built in), max 25A
- PR-113 Combi - Air Compressor & Shop Air, 220V, max 25A, w/ Air Compressor & 30A /w Shop Air

3 MODELS —

- WITH COMPRESSOR
- EXTERNAL AIR
- BOTH
