BigEasy™ Unlocking Tools

Unlocks Cars for Under Half the Price!

**NEW
IMPROVED
HIGH-OUTPUT
LEDs!**

BigEasy™ Night Light

Suction cup LED light
illuminates dark
car interiors.
(see opposite page)

The BigEasy™ actuates the lock button, door handle or electric locks on 98% of all cars and trucks. Fast, easy, with no training. Available in Classic (bright pink), improved Glo (glows bright neon) and Little Easy versions.

Watch the video:
steckmfg.com/video

BigEasy Loop Accessory

A snap-on tool that fits ALL BigEasys. Allows for grabbing of door handles and window handles. Glows in the dark for night time use.
Part No. 32903

Don't forget...

The optional carrying case makes for easy storage and transporting of BigEasy and accessories.

32935 BigEasy™ Carrying Case

BigEasy Extend!

A snap-on tool that fits ALL BigEasys. Provides an extra 12 inches of length to get to out-of-reach items. Glows in the dark for night time use.
Part No. 32905

New! Super Easy Wedge!

A bigger version of our classic Easy Wedge, the Super Easy Wedge is 7 x 9 inches allowing for more power and surface area. Ideal for tighter doors on today's newer vehicles.

**32923
Super Easy
Wedge**

BigEasy™ GLO/ Easy Wedge Kit

- Glow-in-the-dark yellow allows you to see the tool at night or through tinted windows. 55 inches long.
- Easy Wedge offers controlled opening of the car door for inserting the BigEasy Glo.

BigEasy Extend

A snap-on accessory that fits ALL BigEasys. Provides an extra 12 in. of length to get to out-of-reach items. Glows in the dark!

32905 BigEasy Extend

BigEasy Loop

Clips to any BigEasy to allow grabbing of door handles and locks. Glows in the dark!

32903 BigEasy Loop

Paint Protector

Reduces friction between the car door and the BigEasy so the powder coating does not rub off. Comes with every BigEasy kit.

32924 Paint Protector

BigEasy Carrying Case

Carry your BigEasy kit in style. Convenient pockets to store all your unlocking tools.

32935 BigEasy Carrying Case

Easy Wedge

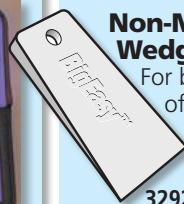

Inflatable controlled opening of car door for insertion of the BigEasy.

32922 Easy Wedge
32923 Super Easy Wedge (7x9")

Non-Marring Wedge

For basic opening of car door for insertion of BigEasy.

32920 Non-marring Wedge

BigEasy Night Light

Suction cup LED light illuminates dark car interiors.

32933 BigEasy Night Light

LittleEasy

When BigEasy is just too long. Works on Japanese imports and some pickup trucks.

32908 LittleEasy

Easily load vehicles with damaged wheels

The Steck 4th Wheel Loader allows tow truck drivers to safely load and secure a vehicle with broken ball joints, lost wheels, locked wheels or brakes, collision damage and control arm failures on their roll back wreckers. It also allows mechanics and body technicians to steer the vehicle into the shop and guide it to lifts or frame racks for repair.

The 4th Wheel Loader is a tough 24" x 14" hardened aluminum fabricated platform with two 4" x 10" Polypropylene roller wheels, six 5/8" holes for mini-J hooks for loading assistance and 1" axles which provides a safe platform to easily hold and secure up to 5 tons while loading a vehicle with broken ball joints and/or a damaged wheel/tire on a roll back.

10" Roller (only)
Part #71484

71480 4th Wheel Loader

Replacement Parts:

- 71481 Load Binder
- 71482 3 inch Shim
- 71483 1-1/2 inch Shim
- 71484 10 inch Black Roller (only)
- 71485 Axle
- 71486 6 Foot Chain

Works with or without wheel

Problem

Temporary* Fix

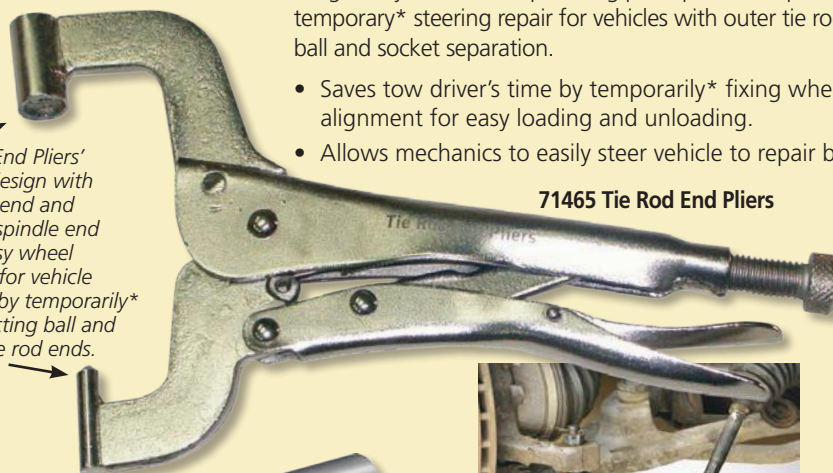

Tie Rod End Pliers' unique design with a socket end and pointed spindle end allow easy wheel pivoting for vehicle steering by temporarily* reconnecting ball and socket tie rod ends.

Tie Rod End Pliers

Tough alloy steel C-clamp locking pliers provide a quick temporary* steering repair for vehicles with outer tie rod end ball and socket separation.

- Saves tow driver's time by temporarily* fixing wheel alignment for easy loading and unloading.
- Allows mechanics to easily steer vehicle to repair bay.

71465 Tie Rod End Pliers

Tie Rod Coupler

Tie Rod Coupler eye-bolts secure the coupler to the broken tie rod by hand tightening or by using a small leverage bar.

- Saves tow driver's time by temporarily* fixing wheel alignment for easy loading and unloading.
- Allows mechanics to easily steer vehicle to repair bay.

71470 Tie Rod Coupler

*Do not use Tie Rod End Pliers or Tie Rod Coupler at speeds over 5 mph or distances over 100 yards.

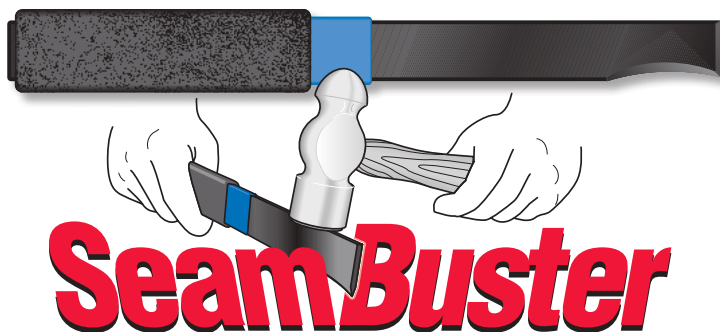

Problem

Temporary* Fix

Easily separate spot welded or bonded panels

SeamBuster

This heavy-duty chisel allows you to easily separate spot welded or bonded panels.

- Save up to 15 minutes per panel replacement.
- For quarter panels, rockers and any other pinchweld.
- Sharpened on two edges. The sharp end allows for penetration between panels and the side edge allows for side impact to drive the panels apart without damage.
- Super tough alloy steel.
- Cushioned handle absorbs shock.

20015 Original SeamBuster

Right Angle SeamBuster

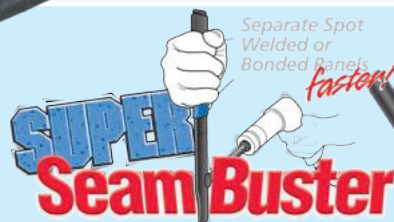

Chisel tip for starting seam separation.

Chisel edge on both sides for easily moving along seam.

Right Angle SeamBuster

90° end to easily separate hard-to-reach spot welded or bonded panels.

20016 - Right Angle SeamBuster

- Attaches to any air hammer.
- Faster than regular SeamBuster.
- For separating quarter panels, rockers, other pinchwelds and bonded door skins.
- Sharpened on two edges for easy penetration and separation of pinchweld.
- Made of super tough alloy steel with cushioned handle.

20017 SUPER SeamBuster

No need for multiple sizes of tow hooks.

I-Bolt: Universal Tow Eye

The Steck I-Bolt: Universal Tow Eye allows towors, body shop technicians, and mechanics to safely load disabled foreign and some domestic vehicles on roll back wreckers and frame racks, without causing damage.

Vehicle manufacturers design specific tow eyes for each model car to pull the vehicle down the assembly line, however, each manufacturer has different diameters ranging from 1/2" to 1" and either right or left handed threaded ends. The I-Bolt adapts to this with unique gripping teeth that lock into the threaded holes on the front or rear of the vehicle. I-Bolt is able to fit threaded holes having diameters of 1/2" up to 1 1/4". This unique design provides a universal hook up solution for the 200+ vehicles. Also included is a 6' x 2" polyester safety strap.

Watch the video: steckmfg.com/video

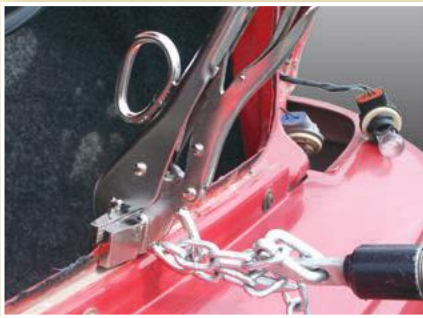

71490 I-Bolt Universal Tow Eye with Safety Strap

...for pull pins & flanges

- Grip and pull multiple pull pins (studs) and vertical or horizontal flanges.
- 3.5 inch jaw provides evenly distributed pulling force while pulling multiple pull pins or flanges.
- 2 large pulling rings for light pulling (up to 2,000 lbs.)

20085 EZ Pull Pliers

Pogo II

A heavy-duty tool for fast leverage pulling.

- Hook bolt heads, flanges, anywhere.
- Core supports repaired quickly
- One hand operation.
- Fits in your toolbox (overall length 18-3/8")

20099 Pogo II

Custom tools only from Steck.

Antenna Wrench

The missing tool you've been looking for to remove antennas.

- Fits most antenna bezel nuts, domestic and foreign
- Simple and compact. Compared to a socket set it's easier to carry and use. And it costs much less!
- Rugged steel construction for years of use.

21600 Antenna Wrench

Universal Molding Release Tool

Our ultimate tool for cleanly releasing molding.

- Slide tool left or right under the molding until it hooks a retaining clip, then just rock the tool with a twist of the wrist to release the clip.
- Heat treated, high-carbon steel.

21500 Universal Molding Release Tool

Super Scraper

Works just like a chisel, but without the damage of hard metal.

- Tough plastic handle can be hit with a hammer.
- Scrape aluminum heads without damage.
- Resharpener when needed with a file.
- Remove decals from coated glass.

71510 Super Scraper

71512 HandySticks Combo (includes 20012 HandyBar and 71510 Super Scraper)

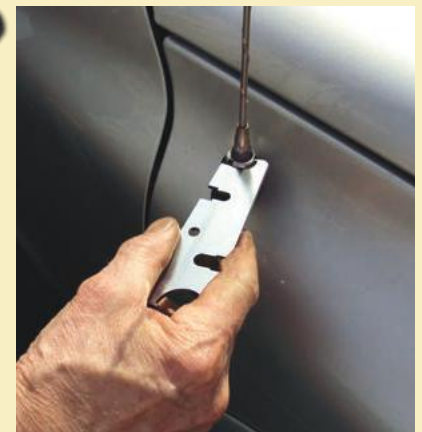

Antenna Wrench II

The Steck 21650 Antenna Wrench II works independently or in conjunction with our popular original Antenna Wrench (21600 - see above).

Made in the USA, the Antenna Wrench II is laser cut from rugged steel then grit blasted and plated to give it a strong and polished finish. It measures 4 1/2" x 1 1/2" x .4". Its unique design expands coverage to more vehicles, such as the removal of difficult Dodge pickup antenna due to the raised hood design.

The Antenna Wrench II works as a two, three and four notch bezel nut wrench of any diameter. Replaces the need for an antenna nut socket wrench set with one tool saving space, money and time searching for the right socket.

The Antenna Wrench II being used on a Dodge truck with raised hood.

21650 Antenna Wrench II

Plugwelding is now faster and easier!

Plugweld Pliers

Our Plugweld Pliers makes plug welding fast and easy. The unique copper alloy backing plate will not stick to welds!

- Plugweld Pliers make plugwelding easier and improve quality.
- Unique design allows technician to clamp panels at the precise spot and still allow for welding. Panels won't separate and weld will not stick to the copper pad.
- Copper alloy pad prevents burn through, allows higher welding temperature and better penetration.

Copper alloy swivel pad will not stick to welds.

Copper alloy swivel pad is replaceable.

23230 Plugweld Pliers

23231 Replacement Copper Swivel Pad

StudLever™ Combo

StudLever™

Tab-It™ Collar

Tab-It™ Padded
Extension Block

Now you can buy the best selling Steck StudLever™ with the Tab-It™ in an affordable combo package!

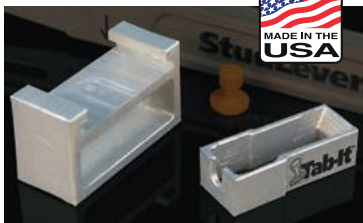

StudLever™

...for controlled stud pulling

The Steck StudLever™ will allow a technician to quickly grip studs (pull pins) and control the dent pulling process as well as the accuracy of the pull.

- Accurate controlled pulls every time
- Grips studs (pull pins) quickly and easily
- Standard tool works on 2.0, 2.2, and 2.6 mm studs as close as 3/8" apart
- Black pivoting base helps compress crown as dent is pulled
- Includes Steck Straight Edge #20003 for matching original contours

Tab-It™

The Steck Tab-It™ accessory allows you to use your StudLever™ to quickly pull glue tabs in the PDR (Paintless Dent Repair) process or pull pins in the traditional body shop process.

Constructed of high-impact polystyrene, the Tab-It™ collar slides over the Stud Lever's handle and captures the glue tab. The included padded extension block raises the StudLever™ to the proper height and protects the surface of the paint.

Doors & Fenders

Axle Popper II™

NEW!

Air tool version of the original Axle Popper

- Use along with the original Axle Popper Kit to speed your repairs.

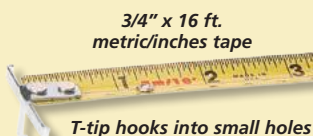

71415 Axle Popper II

Hands-free measuring with this unique tape measure

Measure 'N Stick

The Steck Measure 'N Stick is a professional magnetic tape measure that is perfect for those times when you have to measure solo or want a continuous measurement during a pull. Powerful magnets on 4 sides hold it firmly while the unique tip hooks into a variety of small holes. The adjustable rear tip makes it easy to take hole-to-hole measurements.

- Hands-free measuring
- Continuously monitor your pull.
- Measure without an assistant.
- Both inches and metric.
- Adjustable rear hole slide
- For bodymen, insurance adjusters, and fabricators.

3/4" x 16 ft.
metric/inches tape

T-tip hooks into small holes

Hole slide -
for hole-to-hole measurements.
Slide moves three ways

Four powerful magnets on
side, back and bottom for
hands-free measuring.

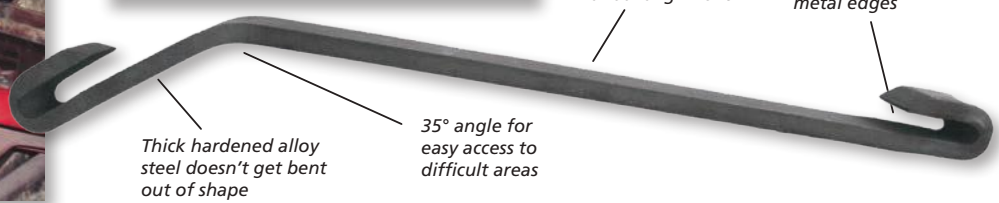

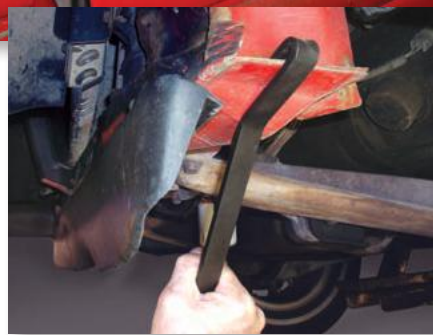

36000 Measure 'N Stick

36050 Refill Tape

Quick realignment of frame flanges, door & hood edges, radiator supports and more!

Flange Lever™

Flange Lever

Quickly access hard to reach damaged frame flanges, door and hood edges as well as radiator supports to bring back to proper edge alignment.

- Move quickly along the damaged area instead of having to unlock and relock locking pliers.
- Tool features multiple angles for maximum leverage in various applications.

20037 Flange Lever

Pull quarter panels and wheel wells

Quarter Puller

The Quarter Puller's 12" bars pull quarter panels and wheel wells.

Q.P. II

The Q.P.'s 6" bars fit into smaller areas.

- Hooks above the lip of the wheel opening.
- Two curvatures (one on each side) will fit almost all cars.
- Easier and faster than clamps or jacks.
- 3000 lb. max. pull

20022 Quarter Puller

20033 Q.P. II

Tools for special needs.

Easy Pry Tool

This non-marring wedge has a 1 inch blade with a curved clip end that allows easy access and removal of plastic bezels, moldings, trim and panels without scratching the surface.

- Non-marring, won't scratch paint.
- Great for removing weather stripping.

21730 Easy Pry Tool

- Remove bezels, moldings, trim and panels easily.

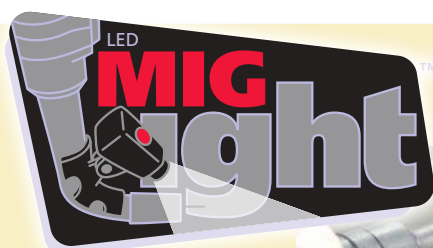

Sure Grip Trim Clip Pliers

The easy way to remove trim clips without breaking them.

- Grips the stem of the clip not the head so clips don't break.
- Lever action for faster, easier removal.
- Works on trim pads, hood insulation, etc.

21720 Sure Grip Trim Clip Pliers

U.S. Patent #5,611,519

LED MIG Light

Illuminate exactly where to start welding!

LED Light is long-lasting and durable

23240 MIG Light

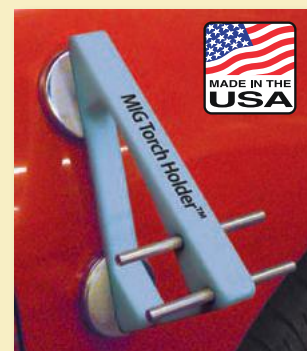

MIG Torch Holder

Holds MIG torch conveniently close to work area!

- Attaches directly to vehicle you're working on.
- Simple prong design for quick and easy retrieval.
- Spring-mounted floating magnets adjust to contour of vehicle body.
- Fits most MIG, TIG and Plasma torch heads.
- Designed for right or left-hand usage.

24200 MIG Torch Holder

Panel Shaper Kit

Use your air hammer to reshape panels, body lines, doors and floors!

Flat Head

Rounded Head

- 1 Chisel Head** - works with door, body lines, corner shaping and fender edges.
- 2 Rounded Head** - straightens out wheel house and quarter panels
- 3 Flat Head** - straightens out floors, trunk floors and provide stress relief in the repair process.

The Panel Shaper is an air hammer driven set of three self lubricating Nylon reinforced heads that allow the technician to easily access deep reach areas and badly deformed sheet metal surfaces to form them back to original shapes. Each kit contains three unique Nylon head shapes with arbors that allow each tool to be attached to your air hammer to fix body lines, concaved areas and flat surfaces.

- *Reshape badly deformed inner panels, body lines and floors*
- *Vibratory shaping takes less time and effort*
- *Three different head shapes to fit all your needs*
- *Fits all standard air hammers*
- *Replacement heads available*

Chisel Head

Using the Panel Shaper with your air hammer gives needed vibration along the damaged frame areas providing stress relief and molecular realignment in the frame structure. In the typical repair processes each head should last 10 work hours.

20046 Panel Shaper Kit
includes Chisel, Rounded, and Flat head

20047 Replacement Chisel Head

20048 Replacement Rounded Head

20049 Replacement Flat Head

Skin a door in less than 10 minutes!

Fits All Standard Air Hammers

Durable Steel Shaft

U.S. Patent #6,722,495

Instructional Video in Every Package!

An air hammer driven door skinning tool that is easily affordable.

- Skins doors in less than 10 minutes.
- Saves arm fatigue and time.
- Replaceable head skins at least 10 doors.

21890 Skin Zipper

21891 Skin Zipper Replacement Head

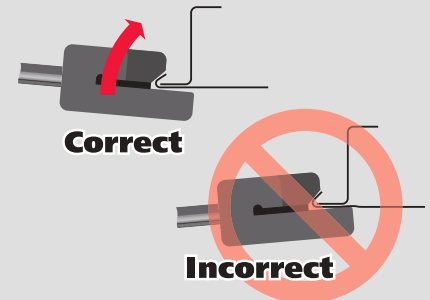

Self-Lubricating Reinforced Nylon Head

Watch the video: steckmfg.com/video

TECH TIP: Skin Zipper

Proper Skin Zipper Usage

1. Avoid sharp body lines.
2. Tilt the tool up while performing Step #1. Doing this gives you a little more than 45° which makes Step #2 easier (see photo). It also keeps the bottom lip of the tool away from the outer surface of the skin.

Step #1

Form edge of door skin to 45 degrees.

Step #2

Finish crimp.

NEW!

For skinning window flanges

The perfect compliment to the original Skin Zipper, the Skin Zipper2 allows you to hem the narrow window flange with minimal arm fatigue.

- **Step One** allows the technician to form the edge of the door skin to an initial 45 degree angle by holding the tool at a right angle to the door. No hammer and dolly work required.
- **Step Two** allows the technician to complete the final form by using the tool at a 45 degree angle. Two side slots are included for left and right application. When completed minimal finishing may be required on corners and body lines.

Step #1

Step #2

The perfect compliment for the original Skin Zipper

21894 Skin Zipper2

21895 Skin Zipper2 Replacement Head

Tools for working with Aluminum

Skin an aluminum door in approximately 15 minutes!

The **AI Skin Zipper** is an air hammer driven door skinning tool with a wider opening for any 1 millimeter aluminum skin and 1.5 millimeter door shell.

Attach a new aluminum door skin with rope hem in approximately 15 minutes.

Aluminum skins are prone to cracking but the **AI Skin Zipper** prevents cracking from happening because it produces a rope hem. When completed, minimal finishing may be required on the corners and body lines. The **AI Skin Zipper** reduces technician arm fatigue from hammer and dolly method. It also allows the technician time to skin the door before the two part bonding agent has set. The self-lubricating head will skin approximately 10 doors and is easy to replace when it wears out.

21892 Aluminum Skin Zipper

21893 Aluminum Skin Zipper Replacement Head

Watch the video: steckmfg.com/video

Step #1

Form edge of door skin to 45 degrees.

Step #2

Finish crimp.

NEW!

The **AI Skin Zipper2** allows you to reach tighter areas than the original AI Skin Zipper, perfect for aluminum door window flange openings.

The **AI Skin Zipper2** can now skin the window opening, which could not be done in the past. Its self-lubricating reinforced nylon head will crimp regular or adhesive bonded skins. The **AI Skin Zipper2** hems or crimps the door skin to the door shell at the window opening, in an easy two-step process.

For use with aluminum door window flanges

Step #1

Form edge of door skin to 45 degrees.

Step #2

Finish crimp.

21896 Aluminum Skin Zipper2

21897 Aluminum Skin Zipper2 Replacement Head

Aluminum and Steel don't mix...

With many vehicles now using aluminum, including the new Ford 150 body, using everyday steel tools can cause galvanic corrosion on aluminum components. Many rubber dollies are simply not heavy enough to work effectively. Maximize your existing steel body tool investment by using **Soft Strike Aluminum Covers** to also work on aluminum body components.

Soft Strike Rubber Dolly Body Covers and the **Soft Strike Dinging Spoon Cover** are made from Buna rubber for use on a steel heel dolly or a dinging spoon.

The **Soft Strike Dolly Body Cover** also eliminates the problem of a rubber dolly not being heavy enough to work effectively by allowing a technician to simply add the cover to his existing steel dolly.

The **Soft Strike Hammer Cover**, made from vinyl, allows the quick and easy transition from using the body tools on steel to aluminum, without the worry of cross contamination and galvanic corrosion.

The **Soft Strike Covers** eliminate the need to invest in redundant, special aluminum application tools. Allows the safe and uncomplicated conversion of existing steel tools to work on aluminum; the removable covers prevent cross contamination and galvanic corrosion.

SoftStrike™ Aluminum Conversion Kit

35000 SoftStrike - Kit of 4 covers

Body tools not included. (Includes #35011 Heel Dolly Face Cover, #35012 Heel Dolly End Cover, #35015 Dinging Spoon Cover, and #35020 Body Hammer Cover.)

Soft Strike Hard Cap for Body Hammer

Installing aluminum door skins requires hammer and dolly for corners and body lines. Using everyday steel tools can cause galvanic corrosion on aluminum products.

Maximize your existing steel body hammer investment by using the Soft Strike Hard Cap Cover for Body Hammer. It features a strong reinforced Nylon head that will not tear when working on aluminum door sharp edges. A flexible O-ring allows a secure fit on hammer heads from 1.5 in. up to 1.6 in.

35025 Soft Strike Hard Cap Cover for Body Hammer

Use your steel body hammer on aluminum!

Soft Strike General Purpose Dolly Cover

Made from Buna rubber for your steel dolly to allow you to easily transition from working body tools on steel to aluminum without the worry of cross contamination and galvanic corrosion.

35013 Soft Strike General Purpose Dolly Cover

(Cover does not include dolly)

Soft Strike .625 Light Toe Dolly Cover

(Cover does not include dolly)

Reduce your investment in redundant body tools by applying our red rubber removable cover to the tool you already own giving you the ability to work on aluminum with no worry of galvanic corrosion.

35017 Soft Strike .625 Light Toe Dolly Cover

Self-Piercing Rivets (SPR) Tools

No need for expensive hydraulic tools to remove and insert self-piercing rivets.

SPR Extraction Tool **NEW!**

Steck's new **SPR Extraction Tool** is a high-grade, hardened steel frame, that uses a 1/2" 20 grade 8 hex bolt, with hardened tip, to easily push out a SPR with your 3/4" or 19mm socket using your 1/2" impact wrench.

The **SPR Extraction Tool** allows the technician to control the repair process without waiting in line for the very expensive hydraulic tools to do the same process.

- 1) Follow manufacturer procedures to remove the trim panel which exposes the SPR's that need to be removed.
- 2) Insert the hardened tip of the hex bolt to the inside of the door, hand tighten the bolt to the center of the SPR backside, keeping the body of the tool against the door flange.
- 3) Install your 3/4" or 19mm socket to your 1/2" impact wrench and engage.
- 4) Within 3-5 seconds you will see the old SPR come out from the bottom.
- 5) Install rope hem on door skin using the AI Skin Zipper (PN 21892) and the window flange with the AI Skin Zipper 2 (PN 21896) or other tools according to manufacturers instructions.

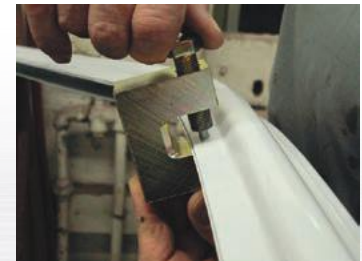

21970 SPR Extraction Tool

SPR Insertion Tool **NEW!**

Steck's new **SPR Insertion Tool** is a high-grade, hardened steel frame, that uses a 1/2" 20 grade 8 hex bolt, with a magnetic end and center recess to hold the replacement SPR, while inserting it with your 3/4" or 19mm socket using your 1/2" impact wrench.

- 1) Technician locates a spot on the flange area, next to the SPR you just removed (after you have replaced the door skin or quarter panel.
- 2) Insert the new SPR on the magnetic end of the bolt, hand tighten to the flange area keeping the body of the tool against the door flange.
- 3) Install your 3/4" or 19mm socket on your 1/2" impact wrench and engage. Within 3-5 seconds you will see the bottom of the screw flush with the door flange.
- 4) Replace the required SPR's and re-install trim panel according to manufacturer procedures.

21960 SPR Insertion Tool

Air Tool Oiler

The adjustable oil nozzle of the Steck Air Tool Oiler Dispenser allows technicians to easily and conveniently oil their air tool each time it is retrieved from the tool box. This unique self centering, non-drip oil dispenser head design allows the technician to easily push the air tool inlet under the dispenser head to oil the air tool or other items.

- Oils your air tools
- Works with all models of air tools
- Saves you money by increasing the life of your tools

Watch the video:
steckmfg.com/video

16600 Air Tool Oiler
(Air tool not included)

Tools that save you time.

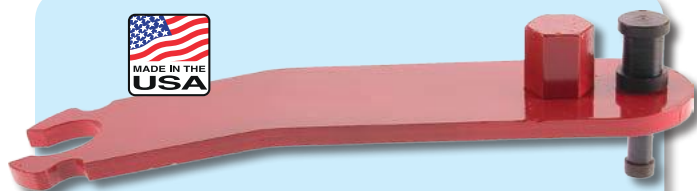

Door Hinge "Pin Popper"

The ultimate solution for removing door pins FAST.

- Drives out even stubborn hinge pins.
- Direct impact.
- Clearance for door panels.
- Works on all GM cars with removable hinge pins.
- Includes Pin Puller to remove loosened pins.

21835 Door Hinge Pin Popper with Pin Puller

E-Z Store Door Aligning Bar

Finally, a convenient door aligning tool that will fit in your tool drawer.

- Saves space. Fits easily in your tool drawer. No long, heavy bar to store!
- Uses your breaker bar for leverage
- Save time. You won't have to hunt for the shop tool.

21845 E-Z Store Door Aligning Bar

Spreaders

High quality, made in the USA spreaders.

35760 - 3" x 4" Spreaders
(50 to a box)

Bushing Tool

Have you ever tried removing a door hinge bushing with just a regular punch? You know it's a hassle. Now there's the Steck Bushing Tool. Its special design makes it easy to punch out bushings, and helps to align bushings when reinstalling.

- Offset design allows for easy access to all door hinges.
- Easily punch out bushings.
- Breaks fewer bushings.
- Super tough alloy steel.

21825 Bushing Tool

*Saves up to
20 minutes
per repair!*

*Angled design
makes bushings
easy to reach.*

*Also helps to align bushings
when reinstalling.*

Car jack not included

E-Z Rest Door Hanger

The E-Z Rest Door Hanger enables a single person to quickly remove and/or install vehicle doors. The padded, removable side rails allow for accurate positioning of the door. The easy on/off design quickly adapts to most floor jacks with removable sides.

- Reduces labor time.
- Padded, removable side rails.
- Easy on/off design and fully adjustable.
- Quickly adapts to most floor jacks with removable saddles.
- Hang bumpers, store glass, many other uses.
- Fits jacks with saddle hole dimensions of 1.17"-1.19" (30mm).

21870 E-Z Rest Door Hanger

TECH TIP: E-Z Rest Door Hanger

Floor jack designs have changed over the years. If the saddle is removable and the center hole is unobstructed you can remove the saddle adapter and reverse the bolt by dropping the bolt from the E-Z Rest Door Hanger through the saddle hole and install the nut and washer from below.

Car and Light Truck Door Spring Tool

The safest tool available for coil springs in GM doors.

- Compresses spring for easy, safe removal.
- Sides safely enclose spring.
- Heat-treated, high carbon steel.

21910 Car and Light Truck Door Spring Tool

Fender Fixer

Collision force to one front fender often travels through the hood to push out the top of the opposite fender. The Fender Fixer rolls that fender top back into shape in just minutes.

20055 Fender Fixer

SAVE Twisted Fenders!

4 Lifting motion rolls fender into desired location

3 Adjust strap

2 Place chisel point of tool into corner of bolt flange of fender

1 Hook Strap Below Fender

5 Hammer top of tool to set

Heavy Duty Portable Bench

Easy to set up, and it disassembles for easy storage.

- Bright yellow powder coat finish.
- 500 lb. capacity.
- Foam on rails prevents scratching of parts.
- Saves warehouse space.
- Saves shipping costs.

35755 Portable Bench

Work Stand Wheeler

The Steck Work Stand Wheeler is a simple and inexpensive wheeled platform accessory for existing X-frame work stands that allows technicians to easily move loaded work stands.

The Work Stand Wheeler's 1-1/2" wide X 36" long steel channel holds either round or square tube stands (X frame). The self up-righting channel with its two large 3" diameter wheels allow the technician to either push or pull the loaded work stand from station to station and over booth grates. The Work Stand Wheeler can accommodate up to a 32" wide extended work stand and easily hold a work stand with up to 500 lbs of components. Its low 3" high profile allows for easy wall storage.

35756 Work Stand Wheeler

(Work stand not included)

Move a loaded work stand easily...by yourself!

• Holds up to 500 lbs. of components

• Holds round or square tube stand (X-frame) work stands

• 36" Long

• 3" low profile for easy wall storage

• Self leveling channel for easy loading

The right tools for your project.

- Eye bolts allow you to manual pull hinge plates, etc.
- Hood hinge plate allows you to manual pull hood and deck lid hinges back into position.

KIT INCLUDES:

- Right Angle Pulling Plate
- 10mm Eye Bolt
- 8mm Eye Bolt
- 6mm Eye Bolt
- Hood Hinge Plate

20222 Handy Pull Kit

20224 Replacement Eyebolts with Ring Clamp

- Great for paintless dent removal.
- For doors and deck lids
- Holds solid.
- Fits any size latch.

17000 Door Jammer

Quality tools from Steck... since 1946.

Steck Manufacturing Company was started as Steck's Paint & Body Shop by George Steck in 1946. George went into manufacturing in the late forties when he and a partner developed a fastener used to install rear fenders.

Steck has continuously manufactured tools and equipment for the collision repair industry in the same location in Dayton, Ohio for over sixty years. George Steck's original body shop building is still part of the Steck Manufacturing complex, and Steck still operates a body shop for research and development purposes.

We are continuously developing new products and look to technicians in the field for new product ideas. We pay royalties for new product ideas that we use.

If you have made a tool that solved a problem for you, it will also solve that same problem for other technicians. Necessity is the mother of invention. We can refine and market your idea and will pay you a royalty. Contact Steck today!

E-Z Strip II Molding Tool

New and improved version of our E-Z Strip Molding tool with a 3" non-marring blade and steel air hammer arbor to remove body side moldings. Durable non-marring wedge design made from polypropylene removes moldings without damaging the molding or scratching paint surfaces. Kit also includes an additional wedge. Wedges can be trimmed to remove moldings imbedded in body lines.

- Saves body moldings
- Reduces body damage
- Saves time and materials
- Can be ground for special requirements

21542 E-Z Strip II Molding Tool Kit

21543 Additional E-Z Strip Molding Tool Wedge

HandyBar™

The Steck HandyBar is a high strength, non-marring tool that you'll use every day.

- Hammer out dents
- Hammer inside quarter panels, rear body panels, body lines, etc.
- Use to block doors and hoods
